INVITATION

We hereby invite you to the
XXVIII. SCIENTIFIC AND PROFESSIONAL CONFERENCE

WATER AND PUBLIC WATER SUPPLY

with the central theme:
WATER SAFETY

Dear fellow scientists and experts,

It is a great honor and privilege to invite you, on behalf of the Organizing Committee, to the 28th "Water and Public Water Supply" Scientific and Professional Conference that will be held at the Imperial Hotel in Vodice.

This year's central theme of the Conference is "Water safety". Safe water supply is a key sector needed for the daily functioning of communities and companies. In the event of emergency situations, such as natural or man-made disasters, the primary objective is to ensure safe water supply to reduce the break-out and spread of water-borne diseases that may occur as a result of disrupted water supply and/or the delivery of contaminated water. Maintaining a high level of preparedness is the key to rapid relief and effective response, to ensure a continuous supply of safe water. Many activities are carried out with a view to strengthening the resilience of water supply infrastructure against chemical, biological and radiological threats by improving the ability to detect threats and taking early response actions. In addition to these, threats related to information technology are another big challenge.

We invite you to actively participate in the work of the Conference by presenting scientific and professional papers on the topic of water supply safety during: the Homeland War, natural disasters, man-made events, cyber-attacks and pandemics.

As always, the Conference also welcomes all related topics of interest to experts and scientists working in the field of water and public water supply.

We look forward to meeting you in Vodice!
