### INVITATION

We hereby invite you to the  
XXIX SCIENTIFIC AND PROFESSIONAL CONFERENCE

## WATER AND PUBLIC WATER SUPPLY

with the central theme:  
**RECREATIONAL AND THERAPEUTIC WATER QUALITY**

Dear fellow scientists and experts,

It is a great honor and privilege to invite you, on behalf of the Organizing Committee, to the 29th "Water and Public Water Supply" Scientific and Professional Conference from 7 to 10 October 2025 in Sv. Martin na Muri.

This year's venue has defined the central theme of the Conference, which is dedicated to the **quality of recreational and therapeutic waters**.

Recreational and therapeutic use of water can have great benefits for the health and well-being of people by improving their physical and mental health. The Republic of Croatia is rich in beaches along the sea, rivers, and lakes, spas with thermo-mineral waters, as well as swimming pool resorts, with a growing trend in holiday home pools. Regardless of their purpose, recreational or therapeutic, all these waters are exposed to numerous dangers that threaten water quality and safety for users. Some of the most important ones are: pollution by waste and storm waters, climate change affecting the temperature regime and biological balance, excessive use of natural resources for tourist purposes. In addition to the above threats, water quality is also affected by inadequate management of facilities and pollution caused by users themselves. In order for therapeutic and recreational waters to be safe for all users, it is necessary to assess and suitably manage health risks.

We invite you to actively participate in the work of the Conference by presenting scientific and professional papers on the central topic, but also other topics of interest to experts and scientists dealing with water and public water supply.

We look forward to meeting you in Sv. Martin na Muri!

Magdalena Ujević Bošnjak, PhD, research associate  
Chair of the Organising and Scientific Committee
